

My wife and I benefit greatly from listening to XM Satellite Radio and its traffic and weather channel, particularly here in the Dallas area. It assists us in avoiding traffic accidents and other delays. This service is not available from other means in a timely fashion. We pay for these services and it should not be up to the National Association of Broadcasters to dictate what we are permitted to hear. We respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that is of excellent public service.
